RABINDRA KUMAR

AI/ML Engineer | Generative AI | Machine Learning | LLMs | RAG

+91-8083984097 | rabindrakumar80834@gmail.com | linkedin.com/in/rabindra-kumar-0b7231318 | GitHub: github.com/rabindra1x

SUMMARY

AI/ML Engineer with hands-on experience building Machine Learning, Deep Learning, and Generative AI applications using Python, PyTorch, TensorFlow, LangChain, LangGraph, and RAG. Experienced in developing end-to-end ML pipelines, LLM-powered systems, autonomous AI agents, and production-oriented REST APIs using FastAPI, Docker, AWS, and PostgreSQL.

EDUCATION

Indian Institute of Technology Patna ,IIT Patna 2023 – 2026
B.Sc. in Computer Science and Engineering, CGPA: 8.3/10 Patna, India

TECHNICAL SKILLS

Programming: Python, SQL
Machine Learning: Scikit-learn, NumPy, Pandas, Matplotlib
Deep Learning: PyTorch, TensorFlow
Generative AI: LLMs, RAG, LangChain, LangGraph, Prompt Engineering, Embeddings, Vector Databases, Fine-tuning
Backend & APIs: FastAPI, REST APIs, SQLAlchemy, Async Programming, Webhooks, API Authentication
Databases: PostgreSQL, MySQL, MongoDB
Deployment & MLOps: Docker, AWS, Model Serving, API Deployment
DevOps & Cloud: Git, GitHub, CI/CD, Kubernetes, Terraform, Jenkins, Ansible, Nginx, Linux

EXPERIENCE

WebMobril Technologies Mar 2026 – Sep 2026
AI/ML Engineer Intern *Noida, India*

- Designed, developed, and optimized Machine Learning and Deep Learning models in Python for AI-driven applications.
- Built end-to-end ML pipelines covering data preprocessing, feature engineering, model training, hyperparameter tuning, and performance evaluation.
- Developed scalable AI solutions using TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, and SQL.
- Collaborated with development teams to integrate, test, and deploy ML models following software engineering best practices.

NASSCOM – BSDM AI RTD 2025, Orbique Technologies Sep 2025 – Jan 2026
AI DevOps Engineer Training *Noida, India*

- Completed the BSDM AI-RTD 2025 training program on AI-driven DevOps automation and cloud deployment; implemented configuration management, automated testing, and version control aligned with global standards.
- Gained practical exposure to CI/CD pipelines using Jenkins, Ansible, AWS, Linux, Git/GitHub, Docker, Nginx, Terraform, and Kubernetes through team-based AI–DevOps projects.

PROJECTS

AI-Powered Cyber Threat Analysis Platform | *Python, FastAPI, Bi-LSTM, Random Forest, PaddleOCR-VL, RAG, OpenAI GPT-4o, FAISS, PostgreSQL*

- Developed a FastAPI-based platform with ML and LLM pipelines that classifies URLs, images, SMS, and emails into safe, suspicious, or dangerous threat levels.
- Implemented phishing, smishing, and visual threat detection using Bi-LSTM, Random Forest, PaddleOCR-VL, and QR-code analysis, producing confidence scores and threat indicators.
- Built a RAG pipeline with OpenAI GPT-4o, FAISS vector retrieval, and PostgreSQL for contextual threat analysis, knowledge-base retrieval, and actionable security recommendations.

Autonomous AI Software Engineering Agent | *Python, LangGraph, LLMs, RAG, Git, Docker*

- Developed an LLM agent with Python and LangGraph that converts natural-language requirements and Wiki/documentation knowledge into implementation plans, code changes, testing, debugging, and code-review workflows with minimal human intervention.
- Implemented repository- and Wiki-aware RAG for document understanding, concept extraction, feature planning, dependency analysis, code generation, and repository modification, with automated testing, failure analysis, and iterative self-debugging.
- Engineered a safety-first execution framework with Git worktree isolation, command/path validation, security scanning, audit logging, checkpoint/resume, bounded retries, human approval gates, and Docker sandboxing.

CERTIFICATIONS

- Complete Machine Learning Course – Simplilearn (2025)
- Deloitte Australia Data Analytics Job Simulation – Forage (June 2025): data analysis, forensic technology
- Artificial Intelligence Certification – Infosys Springboard (2025): ML, DL, NLP, Computer Vision, AI Ethics
